Profile

A talented web developer with over a year of experience building full-stack applications with modern web technologies. Self-taught, with four months commercial freelance experience, including working independently for individual clients, as well as in structured, Agile driven development teams. Strong experience in client communication, foundational dev-ops knowledge, and a good eye for ui/ux design. Looking for challenging work on a modern tech stack, with the opportunity to use and further develop my current skills.

Skills

| Technologies

- HTML5, CSS, modern frameworks
- Modern Javascript, including ES6+ features
- SPA development with Vue, React
- Node - MVC, REST, GraphQL
- Django (Python web framework)
- CSS preprocessors - SASS, Stylus
- NoSQL schema design, queries
- Deployment tools - Docker, AWS, Firebase
- Git

| Workplace

- Problem solver and critical thinker
- Professional and constructive client communication skills
- Strong interpersonal and teamwork skills
- Reliable and conscientious - both former temporary roles led to further work and offers of permanent contracts.

Experience

| Full Stack Web Developer, Freelance June 2019 - present

- Range of very different working environments, from small projects and site features for individual clients to working with an existing team on full-stack web apps.
- Helped develop a progressive web app for landscape architects to reduce a project's carbon footprint. **Vue** front-end, with data stored in google sheets and NoSQL **Cloud Datastore** database, managed server side via the **Google Sheets API** for **Node**. **Git** for version control, remote collaboration with development team via Github.
- Built and integrated a subscription sign up flow for an email newsletter product. **Vue** based single page application. Designed checkout ui and ux. **Stripe Elements** to handle payment, webhook triggered Node functions to interact with **Mautic** CMS and Google **Cloud Firestore** database.
- Received a 5 star feedback rating from every client worked with on the Upwork freelance platform.

| Customer Experience Representative, Drover September 2017, May - June 2018

- Exciting experience in a fast growing startup with an anti-corporate philosophy.
- Regular opportunities to give feedback on ways to improve procedures, systems and product.

| Customer Support Representative, Commuter Club January - April 2018, August 2018

- Provided phone and email support to customers, liaised with third party providers
- Developed vital organisation and time management skills in a time critical business.

Education

Woodhouse Sixth Form College (September 2015 - June 2017):

Achieved ABB at A Level in Geography, Mathematics, Government & Politics respectively

Woodside High School (September 2010 – July 2015): 10 GCSEs A* - C including 5 A*s

Interests

Web development is a recent passion, but I've always been interested in technology: I built my own computer at 15. I love travelling, and since finishing my A Levels I have been travelling twice in South East Asia. This love of travel pairs well with my passion for languages. This year I lived in France for five months while studying and learning French. I also write a travel blog, which I built the site for myself with Express for Node and a custom built CMS.
